ABOUT BEAZ ELECTRONICS

Beaz Electronics, founded in 2016, specializes in low voltage security, communication, and acoustic solutions. The company offers engineering consultancy, contracting, and related services focused on designing sustainable, efficient, and reliable ELV (Extra Low Voltage) systems. Recognized as a trusted advisor by many organizations, BEAZ acts as an extended ELV department for clients—handling planning, design, documentation, coordination with architects, tending, and execution. Their integrated approach spans from project development to final handover, ensuring quality, cost control, and timely delivery through early involvement of construction experts.

EXPERTIZE & PROCESS

BEAZ Specializes in providing consulting, designing, contracting and technical expertise for security. Data. Fiber optic, communication, automation and acoustic solutions.

BEAZ Advisory capacity covers the spectrum from conceptualization and scheme design to detailed design, system specifications, tender documentation, all the way through implementation, commissioning and, when required site services after action reporting. BEAZ's expertise has been built over time developing lasting relationships. Collective expertise that has been flourished through a series of consecutive phases and challenging situations, successful partnerships, collaborations and projects as well as the company's strong ethical values and commitment in always achieving excellence.

TRUSTED ADVISOR.
PROVEN EXPERTISE.

INTEGRATED APPROACH.
SEAMLESS DELIVERY.

QUALITY FOCUSED.
RESULTS DRIVEN.

ETHICAL VALUES.
LASTING RELATIONSHIPS.

CLIENTS & MARKETS

BEAZ work closely with owners, builders, architects, operators, consultants to engineer custom technical solutions for wide range of spaces Core markets for our services includes Residential and commercial spaces, educational buildings, hospitals, shopping malls.

MISSION

Our vision is to be the leading provider of exceptional, efficient, and dynamic solutions that seamlessly integrate into every aspect of human life. Through the transformative power of next-generation technologies—spanning assurance, automation, and analytics—we aim to revolutionize how we live, work, and interact, ensuring that our solutions not only meet but exceed the evolving needs of tomorrow's world.

VISION

“To set new benchmarks in ELV designing and integration, by delivering world-class expertise, sustainable solutions, and unwavering commitment to quality and client satisfaction.”

CULTURE SUSTAINABLE

Through sustainability initiatives, BEAZ endeavors to be a responsible corporate steward of the environment and whenever possible encourages ecofriendly business practices. We support our client's sustainability initiatives and encourage strong conservation programs. Beaz is dedicated to conducting business with integrity, caring for our communities and respecting our environment. Sustainability is always considered in our work. We review our work to minimize components in our designs. The utilization of energy efficient products is also considered and generally preferred.

BEST PRACTICES

We work to the highest global standards across all of our departments. In addition, we actively participate in working groups developing and reviewing standards with various organizations. Our best practices in tendering and implementation are proposing the project latest technological advancements with best possible market prices and after winning the projects implementing it with maximum accuracy on time completion with utmost quality and workmanship.

CORE COMPETANCIES

In today's scenario, designing total ELV plan (Extra low voltage services like – Surveillance system, Security system, Access control, Data, Voice, BGM, etc.) for the new building are becoming too challenging keeping in mind ever changing technology with client's current and future scalability. Most of the client's ensures to hire best of the architect / interior designer to design their offices; however, misses to focus proper ELV plan/execution. We at BEAZ understand the criticality of the ELV Designs and hence works as extended ELV department of client to understand requirements, document it, plan the same, design on evolving level. Coordinate with architect/interior design for the project, and ensure proper execution thereof. BEAZ's approach involves total integration from project development, to design/engineering, through procurement, construction, facility start-up and facility turnover.

In As the ELV security and Data solutions are integral part of modern buildings, we are offering complete solutions under low current systems. we provides design and implementation services for low current systems for small to highly complex buildings, BEAZ always accounts for architectural integration of components, this is necessitas for both design aesthetics and for effective surveillance and safety monitoring , our design and implementation service included but not limited to video surveillance, access control, Wi-Fi, unified communications, data networks, barrier gates, emergency communications, entrance/exit management, parking, security systems, digital communication systems, firealarms systems. Intruder detecting alarms, public address and voice alarm systems, Background music systems, Professional audio systems with acoustical solutions.

DESIGN & CONSULTATION

We deliver the complete range of consulting and design services. This includes design, management and integration advice to provide secure, resilient and scalable solutions. Our Design and Consultation services are dedicated to delivering intelligent, efficient, and future-ready ELV solutions tailored to the specific needs of each client and project. We begin by thoroughly understanding project requirements, operational goals, and site conditions, enabling us to develop customized system designs that align with both functional and strategic objectives.

By combining deep technical expertise with industry best practices, we create fully integrated ELV systems that enhance safety, security, communication, and overall operational efficiency.

Our approach covers the complete design lifecycle, including concept development, system architecture, detailed engineering, and coordination with other disciplines to ensure seamless integration within the built environment. We place strong emphasis on innovation, reliability, and scalability, ensuring that all solutions are adaptable to future technological advancements and expansions.

From initial consultation through to final execution, our team is committed to delivering designs that meet the highest standards of quality, performance, and compliance with international codes and regulations. Through precise planning, advanced design methodologies, and a client-focused approach, we ensure every project is delivered with accuracy, efficiency, and long-term value.

IMPLEMENTATION & SYSTEM INTEGRATION

Our Implementation and System Integration services ensure the seamless execution of ELV solutions, transforming design concepts into fully functional, high-performance systems. With a strong focus on precision and quality, our team manages every stage of the implementation process, including installation, configuration, testing, and commissioning. We work in close coordination with project stakeholders, contractors, and other engineering disciplines to ensure smooth deployment while maintaining strict adherence to project timelines and specifications.

EXPERT INSTALLATION

Professional installation with strict quality standards.

CENTRALIZED CONTROL

Unified platform for real-time monitoring and management.

TESTED & CERTIFIED

Rigorous testing and commissioning for flawless performance.

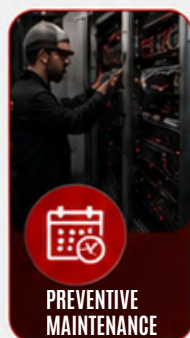

We specialize in integrating diverse ELV systems into a unified and intelligent platform, enabling centralized monitoring, control, and enhanced operational efficiency. Our expertise covers a wide range of systems, ensuring compatibility, interoperability, and optimal performance across all components. By leveraging advanced technologies and proven integration methodologies, we deliver solutions that are reliable, scalable, and easy to manage.

From initial setup to final handover, we conduct rigorous testing and quality assurance procedures to ensure every system operates flawlessly and meets international standards. Our commitment to excellence ensures that each implemented solution not only performs efficiently but also adds long-term value, supporting the evolving needs of our clients and their infrastructure.

MAINTANANCE & SUPPORT

Our Maintenance and Support services are designed to ensure the long-term reliability, performance, and efficiency of all ELV systems. We provide comprehensive support solutions that include preventive maintenance, system monitoring, troubleshooting, and timely upgrades to keep systems operating at optimal levels. Our proactive approach helps identify and resolve potential issues before they impact operations, minimizing downtime and ensuring uninterrupted performance.

PREVENTIVE
MAINTENANCE

SYSTEM
MONITORING

TROUBLESHOOTING
AND REPAIR

TIMELY
UPGRADES

Our team of skilled professionals is equipped to handle both routine maintenance and complex technical challenges, delivering prompt and effective support tailored to client requirements. We also offer periodic system audits, performance assessments, and recommendations for enhancements to ensure systems remain up-to-date with evolving technologies and industry standards.

With a strong commitment to service excellence, we ensure quick response times, continuous technical assistance, and reliable after-sales support. Our goal is to extend the lifecycle of ELV systems while maintaining their efficiency, security, and scalability, providing clients with complete peace of mind and sustained operational value.

Solutions

Safety and Security

We deliver advanced ELV safety and security solutions designed to protect people, assets, and infrastructure. Our systems integrate cutting-edge technologies to provide reliable, real-time monitoring, access control, and threat detection. With a focus on efficiency, scalability, and compliance with industry standards, we ensure a secure environment that supports safe and uninterrupted operations.

Video Surveillance Solution

Video Surveillance Solutions provide advanced monitoring and recording capabilities to ensure comprehensive security coverage across all areas. Utilizing high-definition cameras and intelligent video analytics, we enable real-time monitoring, incident detection, and efficient data management. Our systems are designed for reliability, scalability, and seamless integration, helping clients maintain a safe and secure environment at all times.

Access Control Systems

Access Control Systems are designed to ensure secure and controlled entry to facilities, safeguarding people, assets, and critical areas. By utilizing advanced technologies such as biometric authentication, card-based access, and centralized management platforms, our systems provide a high level of security and are tailored to client needs. Our systems enable real-time monitoring, user management, and seamless integration with other security systems.

Entrance / Exit Management Systems

Entrance and Exit Management Systems regulate and monitor the movement of people and vehicles with accuracy and efficiency. By integrating technologies such as turnstiles, barriers, and automated tracking systems, we ensure smooth flow while maintaining high levels of security. These solutions provide real-time data and seamless integration for enhanced operational control.

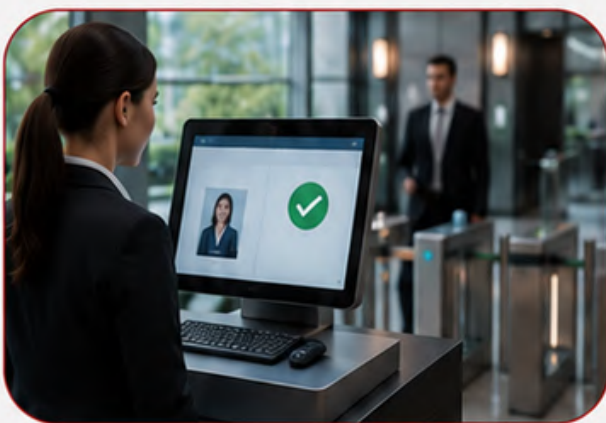

Vehicle Parking Systems

Vehicle Parking Systems provide efficient, secure, and organized parking management solutions. Features such as automated entry/exit control, license plate recognition, and real-time monitoring ensure smooth vehicle flow and optimal space utilization. These systems enhance security, reduce congestion, and deliver a user-friendly parking experience.

Guest Room Management Solutions

Guest Room Management Solutions enhance comfort, convenience, and energy efficiency in hospitality environments. By integrating smart controls for lighting, HVAC, and room access, they create a personalized guest experience while improving operational efficiency through centralized control and automation.

Visitor Management System

Visitor Management System offers a secure and efficient way to manage visitor access and monitoring. Features like pre-registration, ID verification, badge generation, and real-time tracking enhance security and improve visitor experience. The system also integrates seamlessly with other ELV solutions for complete visibility and control.

Fire Alarm System

Fire Alarm Systems provide early fire detection and rapid response to protect life and property. Using advanced smoke, heat, and multi-sensor technologies, they deliver reliable alerts, support quick evacuation, comply with international standards, and integrate seamlessly with other safety systems.

Intrusion Detection System

Intrusion Detection Systems provide continuous monitoring and instant alerts against unauthorized access. Using advanced sensors and perimeter protection, they ensure accurate detection, rapid response, and improved security management.

Nurse Calling System

Nurse Calling Systems enable fast communication between patients and healthcare staff through real-time alerts and easy-to-use interfaces. Integrated with centralized monitoring, they ensure timely response, efficient coordination, and improved patient care.

Data & Voice Communication

We provide advanced ID Data and Voice Communication solutions for seamless connectivity, efficient data transfer, and reliable communication. Built with high-quality components and structured cabling standards, our scalable and secure systems support high-speed networks, improving operational efficiency, collaboration, and overall performance.

Local Area and Wide Area Networks

LAN and WAN solutions deliver reliable, high-speed connectivity with secure, scalable network infrastructure for seamless communication, efficient integration, and optimal performance.

FTX Solutions

FTX (Fiber to the X) Solutions provide high-speed, reliable, and future-ready fiber optic connectivity for residential, commercial, and enterprise environments. Our scalable networks ensure superior bandwidth, low latency, seamless data transmission, and efficient communication.

Wi-Fi Networks

Wi-Fi Network solutions provide secure, high-performance wireless connectivity for modern communication needs. We design optimized wireless infrastructures that ensure seamless coverage, reliable connectivity, high data throughput, and scalable network performance.

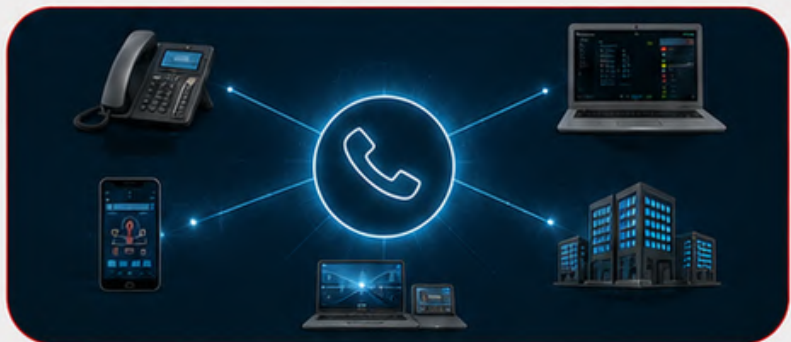

EPBX System

EPBX Systems provide reliable communication solutions with features such as call routing, voicemail, conferencing, and automated attendants, ensuring seamless, scalable, and efficient connectivity across organizations.

IPPBX System

IPPBX Systems provide flexible and cost-effective VoIP communication with seamless call management, remote connectivity, and improved collaboration and efficiency.

Audio/Video Intercom System

Audio/Video Intercom Systems provide secure communication with real-time video verification and clear audio, enabling efficient visitor authentication and controlled access.

Time and Attendance Systems

Time and Attendance Systems provide accurate and efficient workforce management using biometric, RFID, and centralized software platforms. These systems enable real-time monitoring, reporting, and integration with HR and payroll systems, improving productivity and operational efficiency.

Structured Cabling

Structured Cabling Solutions provide a reliable and organized backbone for all communication systems, including data, voice, and multimedia. Designed to meet international standards, these solutions ensure high performance, scalability, and efficient system integration, supporting both current and future network requirements.

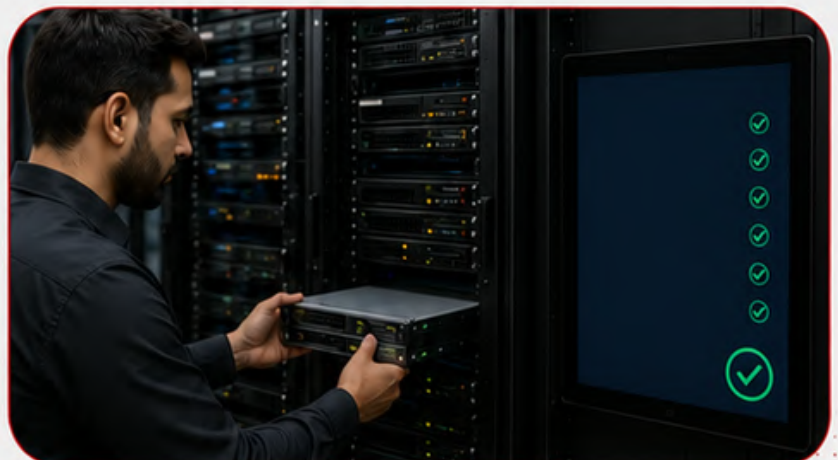

Data Centers & Information Technology

We provide comprehensive Data Centre and Information Technology solutions designed to support critical business operations with high reliability, security, and performance. Our services focus on building robust IT infrastructures that ensure seamless data processing, storage, and management. By leveraging advanced technologies and industry best practices, we deliver scalable, efficient, and future-ready solutions that enhance system availability, operational continuity, and overall business efficiency.

Server Installations

Server Installation services provide secure and high-performance computing environments with complete setup, configuration, virtualization, and system optimization for reliable data handling and seamless IT integration.

Computer and Networking

Computer and Networking solutions provide reliable, secure, and high-performance IT infrastructure to support day-to-day operations. We offer end-to-end services including system setup, network configuration, hardware deployment, and connectivity solutions. By implementing robust networking architectures, we enable seamless communication, efficient data sharing, and enhanced productivity.

Cyber Security

Cyber Security solutions protect IT infrastructure, networks, and data from evolving threats through advanced security systems, continuous monitoring, and proactive risk management, ensuring data integrity, confidentiality, and compliance.

AUDIO & VIDEO

We provide advanced Audio and Video solutions for high-quality communication, collaboration, and immersive experiences. Our scalable and user-friendly systems ensure seamless integration and enhanced presentation across corporate, commercial, residential, and public environments.

Public Address and Background Music System

Public Address and Background Music Systems deliver clear audio communication, emergency notifications, and high-quality music playback with uniform sound coverage, easy control, and seamless integration with other ELV systems.

Home Theatre and Professional Audio Solutions

Home Theatre and Professional Audio Solutions deliver immersive, high-quality sound for residential and commercial applications. Our customized systems ensure superior performance, easy control, and an enhanced entertainment experience.

Acoustic Solutions

Acoustic Solutions optimize sound quality by controlling noise, echo, and sound distribution. Our customized treatments improve speech clarity and audio performance while balancing technical efficiency with aesthetic design.

Audio/Video Conference System

Audio/Video Conference Systems enable seamless communication through high-quality audio and video integration, supporting real-time collaboration, remote connectivity, and efficient presentations.

Displays and Video Walls

Displays and Video Wall Solutions provide dynamic visual communication through high-resolution display systems for digital signage and large-scale video walls, ensuring clear, engaging, and easy-to-manage content delivery.

Interactive Panels

Interactive Panel Solutions feature touch-enabled displays with intuitive interfaces and high-definition visuals, enhancing collaboration, learning, and presentations through seamless integration with existing AV and IT infrastructure.

BUILDING MANAGEMENT & ENERGY MANAGEMENT SYSTEM (BMS/EMS)

We provide advanced Building and Energy Management solutions that enhance operational efficiency, reduce energy consumption, and enable centralized control through intelligent automation, real-time monitoring, and seamless system integration.

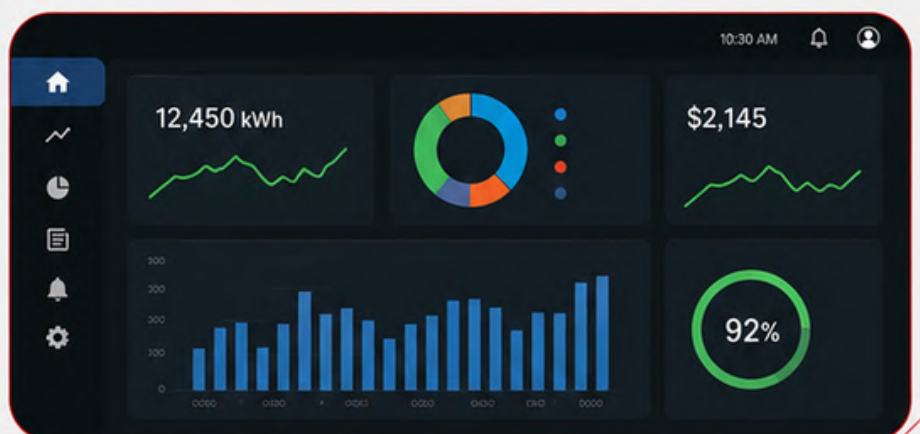

Building Management System (BMS)

Building Management Systems provide centralized control and monitoring of HVAC, lighting, power, and safety systems, improving operational efficiency, system reliability, and real-time facility management.

Energy Management System (EMS)

Energy Management Systems monitor, analyze, and optimize energy consumption, helping reduce operational costs, improve efficiency, and support sustainability through intelligent energy control.

HVAC Monitoring & Control Systems

HVAC Control Systems optimize heating, ventilation, and air conditioning operations through automated control and real-time monitoring, improving indoor comfort while reducing energy consumption and operational costs.

Lighting Control & Automation Systems

Lighting Control Systems provide intelligent automation for indoor and outdoor lighting through scheduling, dimming, and occupancy-based control, improving energy efficiency, user comfort, and lighting lifespan.

Power Monitoring & Energy Metering Systems

Power Monitoring Systems provide real-time tracking and analysis of electrical parameters, helping identify inefficiencies, manage loads, and ensure optimal power utilization.

Building Automation & Control Systems

Building Automation Systems integrate multiple subsystems into a unified platform, enabling automated operations that improve efficiency, reduce manual intervention, and ensure consistent building performance.

Energy Analytics & Optimization Systems

Energy Analytics Solutions provide advanced analysis and reporting tools to identify trends, inefficiencies, and improvement opportunities, helping organizations implement effective energy-saving strategies.

Centralized Monitoring & Command Centre

Centralized Monitoring Solutions provide a single interface to monitor and control building systems with real-time alerts, ensuring efficient management and uninterrupted operations.

Integration with ELV & MEP Systems

These solutions enable seamless integration of BMS with ELV and MEP systems, ensuring coordinated operation, improved efficiency, and enhanced overall system performance.

Fault Detection & Alarm Management Systems

Fault Detection Systems provide real-time alerts and diagnostics to detect faults early, reducing downtime and improving system reliability.

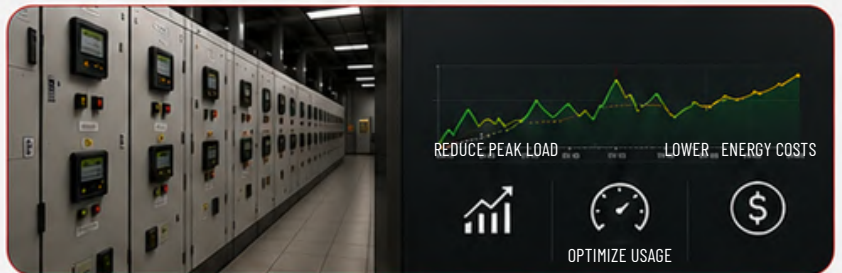

IoT-Based Smart Building Solutions

IoT-enabled solutions provide real-time data, intelligent automation, and remote monitoring through smart sensors and connected devices.

Demand Control & Load Management Systems

Demand Control Systems manage peak loads to reduce energy costs and improve efficiency.

Sustainability & Green Building Solutions

Aligned with green building standards, we help reduce carbon footprint, improve resource utilization, and support long-term sustainability.

HOME & OFFICE AUTOMATION

We provide advanced Home and Office Automation solutions designed to enhance comfort, convenience, security, and energy efficiency. Our systems integrate various controls such as lighting, climate, security, and multimedia into a single intelligent platform, enabling seamless operation and centralized management. With user-friendly interfaces and smart technologies, we deliver customized automation solutions that improve lifestyle, productivity, and operational efficiency in both residential and commercial environments.

Smart Lighting Control Systems

Smart Lighting Solutions enable automated and remote control of lighting systems through scheduling, dimming, and occupancy-based controls. These systems enhance energy efficiency, improve ambiance, and provide user convenience across residential and office spaces.

Climate Control & Smart HVAC Systems

Climate Control Systems provide intelligent management of heating, ventilation, and air conditioning to maintain optimal comfort levels. With automated temperature control and energy optimization features, these systems ensure efficiency and user comfort.

Smart Security & Surveillance Integration

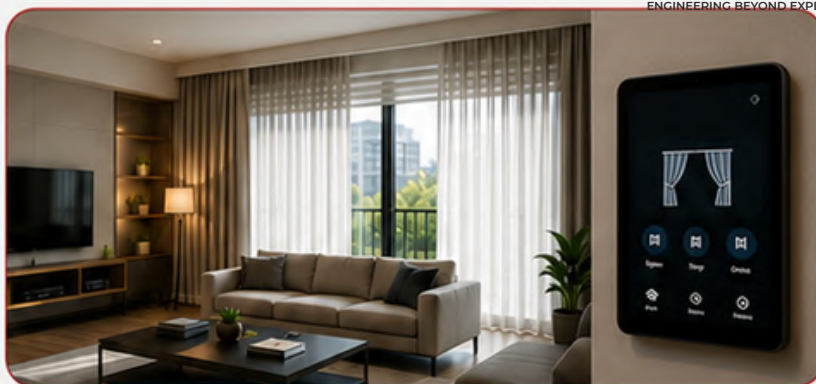

Automation Solutions integrate security systems such as CCTV, access control, and intrusion detection into a centralized platform. This enables real-time monitoring, alerts, and enhanced safety for homes and offices.

Automated Curtains & Blinds Control

Automated Curtain and Blind Systems provide convenient control of natural lighting and privacy through remote or scheduled operation. These solutions enhance comfort, energy efficiency, and modern living experiences.

Audio/Video Automation Systems

AV Automation Solutions provide centralized control of TVs, speakers, and media devices for a seamless and enhanced user experience.

Smart Touch Panels & Mobile App Control

Solutions include touch panels and mobile apps for centralized control, ensuring convenience, accessibility, and real-time system management.

Energy Management & Smart Scheduling

Energy Management features optimize power consumption through smart scheduling and automation, reducing energy costs and improving efficiency.

IoT-Based Smart Home & Office Solutions

IoT-enabled solutions connect smart devices and sensors for intelligent automation, remote monitoring, and data-driven control.

Voice Control & AI Integration

Voice and AI Integration enable voice-controlled systems and intelligent automation, enhancing convenience and user experience.

CYBER SECURITY & DATA PROTECTION

We provide comprehensive Cyber Security and Data Protection solutions designed to safeguard digital infrastructure, sensitive data, and critical systems from evolving cyber threats. Our approach combines advanced technologies, proactive monitoring, and industry best practices to ensure confidentiality, integrity, and availability of information. From network security to data backup and recovery, we deliver reliable and scalable solutions that help organizations maintain secure, compliant, and resilient operations.

Network Security Solutions

Network Security Solutions protect IT infrastructure from unauthorized access and cyber threats through firewalls, intrusion detection, and secure network architectures for safe and reliable data communication.

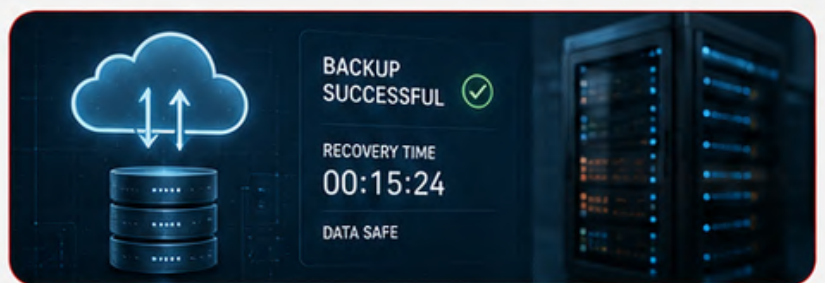

Endpoint Protection Systems

Endpoint Protection Solutions secure computers, servers, and mobile devices from malware and cyber threats through advanced antivirus and real-time monitoring.

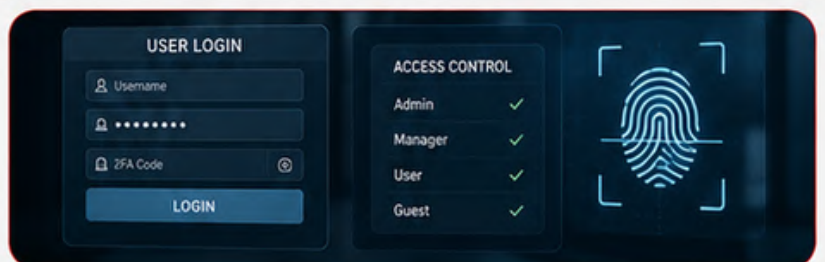

Data Backup & Disaster Recovery Solutions

Data Backup and Disaster Recovery Solutions protect critical data through automated backups, secure storage, and fast recovery to ensure business continuity and minimize downtime.

Identity & Access Management (IAM)

Identity and Access Management Solutions secure systems through authentication, authorization, and role-based access to prevent unauthorized access.

Firewall & Threat Management Systems

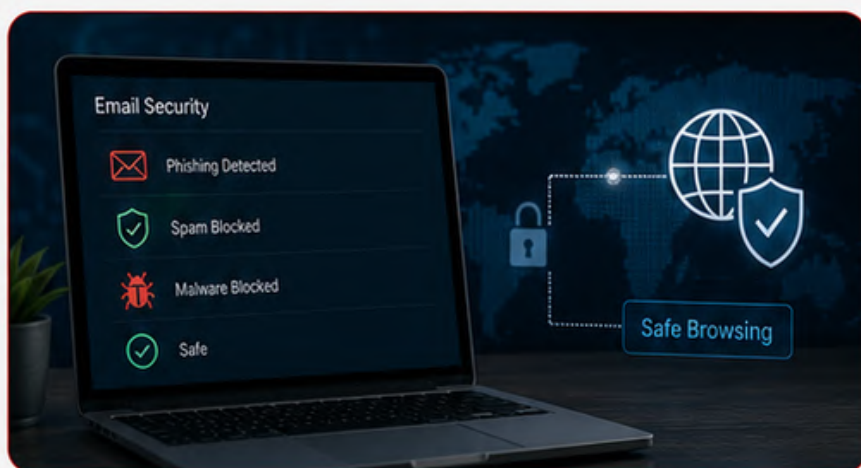

Firewall and Threat Management Solutions protect networks by monitoring traffic and detecting, preventing, and responding to cyber threats in real time.

Email & Web Security Solutions

Email and Web Security Solutions protect organizations from phishing, spam, malware, and unsafe web content. By filtering and monitoring communications, we ensure secure browsing and communication environments.

Security Monitoring & Incident Response

Security Monitoring Solutions provide continuous surveillance of IT systems to detect and respond to threats in real time. With proactive incident management and rapid response strategies, we minimize risks and ensure system integrity.

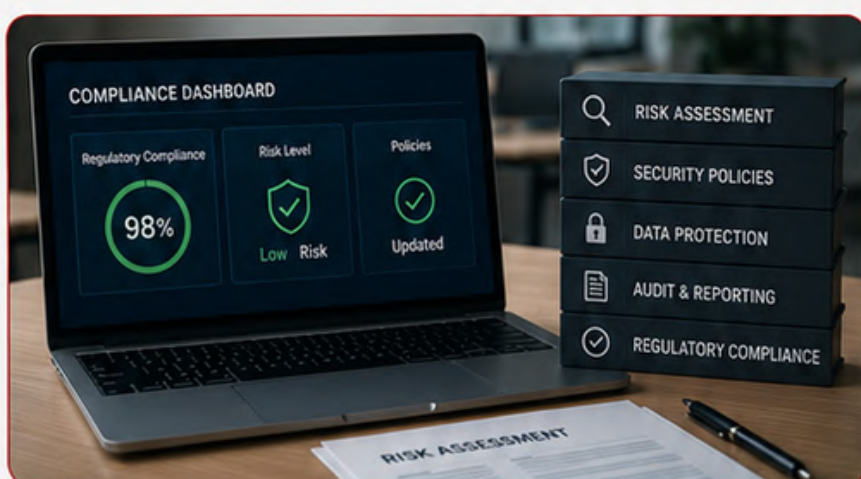

Data Encryption & Privacy Protection

Data Encryption Solutions secure sensitive information by converting it into protected formats, ensuring confidentiality during storage and transmission. We also implement privacy controls to comply with data protection regulations and standards.

Compliance & Risk Management Solutions

Compliance and Risk Management Solutions help organizations adhere to industry standards and regulatory requirements. We conduct risk assessments, implement security policies, and ensure continuous compliance to protect business operations.

POWER BACKUP SOLUTIONS

We provide reliable and efficient Power Backup Solutions designed to ensure uninterrupted operation of critical systems and infrastructure. Our solutions are engineered to deliver continuous power supply during outages, voltage fluctuations, and other electrical disturbances. By integrating advanced technologies and high-quality equipment, we ensure system reliability, protection, and operational continuity across residential, commercial, and industrial environments.

Uninterruptible Power Supply (UPS) Systems

UPS Systems provide instant backup power to critical equipment during power interruptions, ensuring zero downtime and protection against voltage fluctuations. Designed for reliability and efficiency, our solutions support a wide range of applications from small offices to large data centers.

Battery Backup Systems

Battery Backup Solutions deliver reliable energy storage to support continuous power supply during outages. We provide high-performance battery systems with long life cycles, efficient charging, and safe operation, ensuring dependable backup for critical loads.

ONSITE SUPPORT

Every company faces challenges with IT, telecom solutions, and after-sales support. We help clients create a smooth and hassle-free working environment through reliable service and expert assistance.

Our onsite support team assists with system setup and staff training to handle day-to-day technical issues with ease. Continuously upgrading their skills and expertise, our team stays aligned with evolving technologies to deliver dependable support.

INDUSTRY EXPERIENCE & BEST PRACTICES

We make good use of rich industry experience and industry best practices to provide instantaneous and effective problem-solving and take care of all necessary upgrades and maintenance activity for your complete infrastructure.

Our specialist's team can enable the seamless integration of systems and technologies from different suppliers, as well as between legacy equipment and cutting-edge technology.

INDUSTRIAL SECTORS

- ❖ RESIDENTIAL BUILDINGS
- ❖ COMMERCIAL SPACES
- ❖ HOSPITALS AND HEALTH SECTORS
- ❖ SCHOOLS AND EDUCATIONAL SECTORS
- ❖ INDUSTRIAL AREAS
- ❖ PUBLIC SPACES

RESIDENTIAL BUILDINGS

Your home is one of your greatest lifetime investments, holding your most valuable assets—your family, pets, and memories. As safety concerns continue to grow, protecting your loved ones and property becomes increasingly important. At BEAZ, life safety and asset protection are at the core of every system we design. We carefully assess each customer's unique security needs to provide reliable and effective protection.

BEAZ offers comprehensive residential security solutions to protect your home, belongings, and loved ones from risks such as fire, theft, and intrusion. Whether you are at home, asleep, or away, our systems provide the confidence of knowing your family and property are truly secure.

COMMERCIAL SPACES

When managing public buildings with constant movement of people, ensuring safety, controlled access, and property protection is essential. BEAZ Security Solutions provides customized security management systems for facilities of all sizes and complexities, enabling centralized monitoring and rapid response during incidents.

Through access control, intrusion detection, video surveillance, and intercom solutions, BEAZ Security Solutions delivers tailored technologies to meet specific security requirements.

When optimizing a building's security and fire safety, you need solutions that protect people, secure assets and lower operating costs — and that's what we deliver for businesses worldwide. Our access control, fire detection, mass notification, and video surveillance solutions protect your business by making sure your commercial security and fire systems perform on demand as designed. No matter what size or type of facility, we offer flexible, cost-effective solutions.

HOSPITALS AND HEALTH CARE SECTORS

As healthcare facilities grow and operate круглосуточно, they face increasing security and safety challenges, including theft, unauthorized access, fire risks, and protection of sensitive records, medical equipment, and pharmaceutical inventories. Ensuring patient safety and quality care remains the highest priority.

Our Healthcare Security Solutions combine advanced technology and industry expertise to deliver secure, compliant, and efficient healthcare environments. From risk assessment and system design to ongoing support, we provide customized solutions that enhance safety, operational efficiency, and overall patient and staff experience.

ACCESS CONTROL
Secure access to sensitive areas

VIDEO SURVEILLANCE

PROJECTS

Over the past nine years, we have successfully completed hundreds of small and medium-scale projects across various sectors, consistently delivering quality solutions and achieving complete client satisfaction. Our commitment to excellence, reliability, and professional service has helped us build long-term relationships with our clients. Some of our prestigious and noteworthy projects are highlighted below.

BAREFOOT ON THE HILLS – GOOD EARTH BUILDERS

Barefoot on the Hills is a premium mixed-development residential project featuring villa plots and townhouses set amidst a scenic hilltop environment. Designed to blend modern living with nature, the development offers a well-planned and refreshing living experience.

We executed the complete ELV and communication scope for the project, including optical network connectivity, CCTV surveillance, communication systems, access control, entrance and exit management, professional audio, Wi-Fi, and intercom solutions, ensuring seamless connectivity, security, and efficient system integration.

CAPKON CITY @ CALICUT

Capkon City is a landmark township development in Calicut featuring residential towers, business centres, convention facilities, and premium developments with world-class infrastructure and modern urban living.

We are the ELV contractor for this prestigious project, delivering integrated solutions including optical network connectivity, CCTV surveillance, communication systems, access control, entrance and exit management, professional audio, video walls, Wi-Fi, and intercom systems for seamless connectivity, security, and efficient operations.

In the past nine years of our journey, we have successfully completed hundreds of small to medium scale projects with completely satisfied clients, some of our prestigious projects are detailed below.

LANDMARK WORLD

Landmark World is a residential township project featuring six high-rise towers with 572 luxury apartments, convention facilities, and architecturally distinctive spaces. The development combines modern infrastructure with innovative design to create a vibrant environment for living and business activities.

We are delivering a comprehensive ELV infrastructure for the project, including high-speed optical network connectivity, CCTV surveillance, communication systems, access control, entrance and exit management, professional audio, intercom, and Wi-Fi solutions across residential areas.

Our integrated solutions ensure reliable performance, enhanced security, seamless connectivity, and a future-ready environment throughout the development.

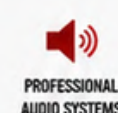

LANDMARK VILLAGE

Landmark Village is a premium residential development with multiple high-rise towers designed for modern and comfortable living.

We delivered a comprehensive ELV and communication infrastructure, including optical network connectivity, CCTV surveillance, communication systems, access control, entrance and exit management, professional audio, video walls, and Wi-Fi solutions across residential areas.

Our integrated systems ensured reliable connectivity, enhanced security, and efficient performance for a smart and future-ready living environment.

FLAME N GO RESTAURANTS

Flame N Go is a rapidly growing restaurant chain with outlets across Kerala and Dubai, including locations at Lulu Mall Trivandrum and Lulu Mall Kozhikode, with further expansion underway at Lulu Mall Ernakulam.

As the ELV integrator for these outlets, we deliver optical network connectivity, CCTV surveillance, communication systems, access control, professional audio, intercom, and Wi-Fi solutions.

Our integrated systems ensure reliable performance, enhanced security, and seamless communication, supporting efficient operations across all Flame N Go locations.

As one of the best growing restaurant chains in Kerala and Dubai, we are proud to be the ELV integrators of Flame n GO restaurants @ LULU mall Trivandrum and LULU mall Kozhikode and Highlight Mall Kozhikode.

DOCTORS ENCLAVE BY IMA @ MANJERI

Twin Tower Doctors Conclave is a landmark high-rise development in Manjeri, comprising two 24-floor towers designed as a modern professional and residential space for the medical community.

We successfully executed the complete ELV scope, including optical network connectivity, CCTV surveillance, access control, and intercom systems, ensuring seamless communication and enhanced security throughout the facility.

Our solutions delivered reliable performance, efficient operation, and long-term system reliability across the development.

RECOGNITIONS

01 TOKEN OF APPRECIATION

A token of appreciation from Landmark Millenia Centre, recognizing our skills, dedication, and valuable contribution to their vision.

02 MISSION-100 DAYS

Honoured by Landmark Village for our commitment and dedicated service, awarded in recognition of our performance and support.

03 CERTIFICATE OF APPRECIATION

Certificate of appreciation from CAPKON for our valuable contribution to the successful completion of their project.

04 CAPKON CITY MOMENTO

A special memento from Capkon City, symbolizing our partnership and shared success.

05 BAREFOOT ON THE HILLS MOMENTO

A memento from GoodEarth's Barefoot on the Hills, thanking us for being a part of their journey towards creating goodness with nature.

These achievements belong to our incredible team, valued partners, and trusted clients.

Together, we build. Together, we grow.
